Aleš TRUNDA

Front-end developer

PROFILE

I started in IT years ago as a solo freelancer working on small projects. Since I'm very interested in self-development and learning, I've worked my way up to large projects used by thousands of users every day.

I made my first web pages as a school project back in 2006. Since then I've been involved in hundreds of web projects across multiple industries.

LANGUAGE SKILLS

Czech - native speaker

English - B2

German - basic level
